PROFESSIONAL SUMMARY

Full Stack Developer with 1.5 years of experience building production-grade healthcare web applications using the MEVN stack. Proven track record of delivering scalable RESTful APIs, responsive UIs, and maintaining clean code to support high-impact product teams.

WORK EXPERIENCE

Full Stack Developer – Teslon Technologies Pvt. Ltd.

Nov 2024 – Present | Bangalore

- Built and maintained production-ready web and mobile healthcare applications serving hospital clients, reducing manual workflow time by approximately 30%.
- Designed and integrated RESTful APIs handling both backend business logic and frontend consumption, enabling seamless data flow across microservices.
- Architected scalable backend services using Node.js and Express.js, and crafted responsive, accessible UIs with Vue.js — supporting 10+ concurrent hospital client deployments.
- Contributed end-to-end features across the full development lifecycle from requirements to deployment using Docker and Git-based CI pipelines.
- Collaborated cross-functionally with designers and QA to ship high-impact product features on time across multiple parallel projects.

Data Science Intern – Airobosoft Product & Service

2023 | Bangalore

- Engineered a Vehicle Number Plate Recognition system achieving 95% detection accuracy using Python and OpenCV-based image processing pipelines.
- Improved number plate extraction efficiency by 30% through optimised preprocessing techniques using NumPy and Pandas.

EDUCATION

Government Engineering College, Karwar (VTU Belagavi)

B.E. Computer Science Engineering

81%

CERTIFICATIONS

Java Intermediate Certification

Python Developer Certification

Web Development Foundations

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Java, HTML5, CSS3, Python

Frameworks & Libraries: Vue.js, Node.js, Express.js, Angular, Bootstrap

Databases: MongoDB, MySQL

DevOps & Tools: Docker, Git, GitHub, Linux, RESTful API design

Practices: Full dev lifecycle (dev → deployment), Low-level design

Bonus: NumPy, Pandas, Matplotlib, OpenCV (image processing)

KEY PROJECTS

Employee Data Management System

- Designed and implemented a full-stack system for managing employee records, improving administrative efficiency by 40% compared to the previous manual process.
- Used MongoDB for high-integrity data storage with custom indexing and Node.js/Express.js for the API layer, served via a dynamic HTML/CSS frontend.
